

ICN Board Meeting Minutes

February 16, 2016

Present: Mandy, Megan, Doug, Peter, Andrew

Spring Seminar

- Unfortunately we had to cancel the class due to low enrollment
- However, interest was high despite low enrollment
- We plan on directing this interest and energy toward a symposium in the future rather than a full seminar

CCRG (Collaborative Challenge Research Grant)

- We have received the CCRG applications and have sent out confirmation emails to all applicants
- ICN board members will sort through the proposals, proposals that are incomplete will be automatically disqualified
- Complete proposals will be submitted to the review panel consisting of faculty and staff with expert knowledge
- An ICN board member will attend the review panel to facilitate/assist if necessary

Future Funding

- The ICN has experienced great success over the last few years, however, as the students who serve on the board graduate and move on, new leadership and direction are necessary to continue these successes and build upon them
- The board is working on securing future funding to continue the leadership and management of the ICN
- We will emphasize our successes and our value to the graduate student body with special attention paid to professional & academic development
