

Professional Development: How to thrive in graduate school and in the job-search period thereafter

Announcing a new course for Spring 2017!

ICN Professional Development Series:
(1 credit-BIOB 595 CRN #35197)

The Interdisciplinary Collaborative Network (ICN) is a graduate student initiative that promotes interdisciplinary research and professional development. This spring, the ICN will offer a 1 credit seminar on how to thrive in graduate school and in the job-search period thereafter. The course will take place on Mondays during the spring semester from 11:00 a.m. - 12:20 p.m. Topics to be covered include how to run effective committee/advisor meetings, how to maintain a healthy work-life balance, how to give compelling presentations, how to use academic experience to find work outside academia, how to hone your CV, and how to network both in academia and the private sector. Students will leave this course uniquely prepared to enter the labor market or to continue their paths through the academic world. Additionally, students will have the chance to be a part of a diverse cohort of graduate students from an array of departments and programs.

The CRN is 35197 and the course can be found on CyberBear under Biology-General, Special Topics course number 595; the course instructor is listed as Mandy Lynn Slate. We hope you will enroll.

Don't miss this unique opportunity!!
